

## SAFETY DATA SHEET STP® Power Steering Fluid

The REACH etc. (Amendment etc.) (EU Exit) Regulations 2019, SI 2019/758 (as amended).

SECTION 1: Identification of the	ne substance/mixture and of the company/undertaking	
1.1. Product identifier		
Product name	STP® Power Steering Fluid	
Product number	00204, 17699	
1.2. Relevant identified uses o	f the substance or mixture and uses advised against	
Identified uses	Power steering fluid.	
Uses advised against	No specific uses advised against are identified.	
1.3. Details of the supplier of the	1.3. Details of the supplier of the safety data sheet	
Supplier	Energizer Trading Ltd Sword House Totteridge Road High Wycombe HP13 6DG UK Tel: +44 845 602 1995 euregulatory@energizer.com	
1.4. Emergency telephone nur	1.4. Emergency telephone number	
Emergency telephone	+44 1495 350234 Monday - Thursday: 0830 - 1700 Friday: 0830 - 1530	
National emergency telephone number	<ul> <li>Product information has been submitted to the UK National Poisons Information Service (NPIS) and is accessible to medical health professionals.</li> </ul>	
SECTION 2: Hazards identification		
2.1. Classification of the substa		
Classification (SI 2019 No. 720 Physical hazards	D) Not Classified	
Health hazards	Not Classified	
Environmental hazards	Not Classified	
2.2. Label elements		
Hazard statements	NC Not Classified	
Precautionary statements	P102 Keep out of reach of children.	
2.3. Other hazards		
This product does not contain any substances classified as PBT or vPvB.		
SECTION 3: Composition/information on ingredients		

### **SECTION 4: First aid measures**

4.1. Description of first aid me	asures
General information	Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing.
Inhalation	If throat irritation or coughing persists, proceed as follows. Remove person to fresh air and keep comfortable for breathing. Get medical attention if symptoms are severe or persist.
Ingestion	Rinse mouth thoroughly with water. Never give anything by mouth to an unconscious person. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if symptoms are severe or persist.
Skin contact	Remove contaminated clothing and rinse skin thoroughly with water. Continue to rinse for at least 15 minutes. Get medical attention if symptoms are severe or persist after washing.
Eye contact	Rinse immediately with plenty of water. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention if symptoms are severe or persist after washing.
4.2. Most important symptoms	and effects, both acute and delayed
General information	The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
Inhalation	Prolonged or repeated exposure to vapours in high concentrations may cause the following adverse effects: Drowsiness. Dizziness.
Ingestion	May cause discomfort if swallowed.
Skin contact	Prolonged skin contact may cause redness and irritation.
Eye contact	May cause irritation.
4.3. Indication of any immedia	te medical attention and special treatment needed
Notes for the doctor	Treat symptomatically. Keep affected person under observation.
SECTION 5: Firefighting meas	sures
5.1. Extinguishing media	
Suitable extinguishing media	Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire- extinguishing media suitable for the surrounding fire.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
5.2. Special hazards arising fr	om the substance or mixture
Specific hazards	Containers can burst violently or explode when heated, due to excessive pressure build-up.
Hazardous combustion products	Thermal decomposition or combustion products may include the following substances: Oxides of carbon. Toxic gases or vapours.
5.3. Advice for firefighters	
Protective actions during firefighting	Use water to keep fire exposed containers cool and disperse vapours.
Special protective equipment	Use protective equipment appropriate for surrounding materials. Wear positive-pressure self- contained breathing apparetus (SCBA) and appropriate protective clothing. Firefighter's

**SECTION 6: Accidental release measures** 

for firefighters

clothing will provide a basic level of protection for chemical incidents.

contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's

#### 6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions	Wear protective clothing as described in Section 8 of this safety data sheet. Eliminate all ignition sources if safe to do so. Avoid contact with skin and eyes.	
6.2. Environmental precautions		

#### Environmental precautions Avoid discharge into drains or watercourses or onto the ground.

#### 6.3. Methods and material for containment and cleaning up

Methods for cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. No smoking, sparks, flames or other sources of ignition near spillage. Eliminate all ignition sources if safe to do so. Do not touch or walk into spilled material. Absorb in vermiculite, dry sand or earth and place into containers. Use only non-sparking tools. Containers with collected spillage must be properly labelled with correct contents and hazard symbol.

#### 6.4. Reference to other sections

**Reference to other sections** See Section 11 for additional information on health hazards. For waste disposal, see Section 13.

#### SECTION 7: Handling and storage

### 7.1. Precautions for safe handling Usage precautions Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Ground/bond container and receiving equipment. Take precautionary measures against static discharges. Keep away from heat, sparks and open flame. Provide adequate ventilation. Avoid contact with eyes and prolonged skin contact. Good personal hygiene procedures Advice on general occupational hygiene should be implemented. Wash hands and any other contaminated areas of the body with soap and water before leaving the work site. Do not eat, drink or smoke when using this product. 7.2. Conditions for safe storage, including any incompatibilities Storage precautions Store in a cool and well-ventilated place. Keep away from heat, sparks and open flame. Take precautionary measures against static discharges. 7.3. Specific end use(s) Specific end use(s) The identified uses for this product are detailed in Section 1.2. SECTION 8: Exposure controls/Personal protection 8.1. Control parameters Distillates (petroleum), hydrotreated heavy paraffinic (CAS: 64742-54-7) DNEL Workers - Inhalation; Long term local effects: 5.6 mg/m<sup>3</sup> General population - Inhalation; Long term local effects: 1.2 mg/m<sup>3</sup> **PNEC** Oral; 9.33 mg/kg

#### Phosphorodithioic acid, mixed O,O-bis(2-ethylhexyl and iso-Bu) esters, zinc salts (CAS: 68442-22-8)

DNEL	Workers - Inhalation; Long term systemic effects: 8.05 mg/m <sup>3</sup>
	Workers - Dermal; Long term systemic effects: 11.4 mg/kg/day
	General population - Inhalation; Long term systemic effects: 1.98 mg/m <sup>3</sup>
	General population - Dermal; Long term systemic effects: 5.71 mg/kg/day
	General population - Oral; Long term systemic effects: 0.24 mg/kg/day

PNEC	Fresh water; 4 µg/l marine water; 4.6 µg/l STP; 100 mg/l Sediment (Freshwater); 0.045 mg/kg Sediment (Marinewater); 0.005 mg/kg Soil; 0.007 mg/kg Oral; 10.67 mg/kg
8.2. Exposure controls	
Protective equipment	
Appropriate engineering controls	Provide adequate ventilation. All handling should only take place in well-ventilated areas. Avoid inhalation of vapours and spray/mists. Use explosion-proof electrical, ventilating and lighting equipment.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Wear tight-fitting, chemical splash goggles or face shield.
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. Frequent changes are recommended.
Other skin and body protection	Wear appropriate clothing to prevent repeated or prolonged skin contact.
Hygiene measures	Do not smoke in work area. Wash promptly with soap and water if skin becomes contaminated. Wash at the end of each work shift and before eating, smoking and using the toilet.
Respiratory protection	Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Ensure all respiratory protective equipment is suitable for its intended use and is 'UKCA'-marked.
Environmental exposure controls	Keep container tightly sealed when not in use.

### **SECTION 9: Physical and chemical properties**

Oxidising properties       The mixture itself has not been tested but none of the ingredient substances meet the criteria for classification as oxidising.         9.2. Other information       No information required.         SECTION 10: Stability and re=tivity         10.1. Reactivity         Reactivity       There are no known reactivity hazards associated with this product.         10.2. Chemical stability       Stable at normal ambient temperatures and when used as recommended.         10.3. Possibility of hazardous       Vill not polymerise.         reactions       Will not polymerise.         reactions       Avoid excessive heat for prolonged periods of time.         10.5. Incompatible materials       Keep away from oxidising materials, heat and flames.         10.6. Hazardous decomposition products may include the following substances: Carbon. Nitrogen. Zinc.         SECTION 11: Toxicological iffects	Viscosity	-
9.2. Other information       No information required.         SECTION 10: Stability and reactivity         10.1. Reactivity         Reactivity       There are no known reactivity hazards associated with this product.         10.2. Chemical stability       Stable at normal ambient temperatures and when used as recommended.         10.3. Possibility of hazardous       Will not polymerise.         Possibility of hazardous       Will not polymerise.         reactions       Will not polymerise.         10.4. Conditions to avoid       Avoid excessive heat for prolonged periods of time.         10.5. Incompatible materials       Materials to avoid         None at ambient temperatures. Thermal decomposition or combustion products may include the following substances: Oxides of the following substances: Carbon. Nitrogen. Zinc.         SECTION 11: Toxicological information       None at ambient temperatures. Thermal decomposition or combustion products may include the following substances: Oxides of the following substances: Carbon. Nitrogen. Zinc.	Explosive properties	Not considered to be explosive.
Other information       No information required.         SECTION 10: Stability and reactivity         10.1. Reactivity         Reactivity       There are no known reactivity hazards associated with this product.         10.2. Chemical stability       Stable at normal ambient temperatures and when used as recommended.         10.3. Possibility of hazardous       Feactions         Possibility of hazardous       Will not polymerise.         reactions       Will not polymerise.         10.4. Conditions to avoid       Avoid excessive heat for prolonged periods of time.         10.5. Incompatible materials       Materials to avoid       Keep away from oxidising materials, heat and flames.         10.6. Hazardous decomposition products       None at ambient temperatures. Thermal decomposition or combustion products may include the following substances: Oxides of the following substances: Carbon. Nitrogen. Zinc.         SECTION 11: Toxicological information       Information on toxicological effects	Oxidising properties	
SECTION 10: Stability and reactivity         10.1. Reactivity         Reactivity       There are no known reactivity hazards associated with this product.         10.2. Chemical stability       Stable at normal ambient temperatures and when used as recommended.         10.3. Possibility of hazardous       reactions         Possibility of hazardous       Will not polymerise.         reactions       Will not polymerise.         10.4. Conditions to avoid       Avoid excessive heat for prolonged periods of time.         10.5. Incompatible materials       Materials to avoid         Materials to avoid       Keep away from oxidising materials, heat and flames.         10.6. Hazardous decomposition products       None at ambient temperatures. Thermal decomposition or combustion products may include the following substances: Oxides of the following substances: Carbon. Nitrogen. Zinc.         SECTION 11: Toxicological information       I.1.1. Information on toxicological effects	9.2. Other information	
10.1. Reactivity         Reactivity       There are no known reactivity hazards associated with this product.         10.2. Chemical stability       Stable at normal ambient temperatures and when used as recommended.         10.3. Possibility of hazardous reactions       Vill not polymerise.         Possibility of hazardous to avoid       Will not polymerise.         10.4. Conditions to avoid       Avoid excessive heat for prolonged periods of time.         10.5. Incompatible materials       Materials to avoid         Materials to avoid       Keep away from oxidising materials, heat and flames.         10.6. Hazardous decomposition products       None at ambient temperatures. Thermal decomposition or combustion products may include the following substances: Oxides of the following substances: Carbon. Nitrogen. Zinc.         SECTION 11: Toxicological information       11.1. Information on toxicological effects	Other information	No information required.
Reactivity       There are no known reactivity hazards associated with this product.         10.2. Chemical stability       Stable at normal ambient temperatures and when used as recommended.         10.3. Possibility of hazardous       Stable at normal ambient temperatures and when used as recommended.         10.3. Possibility of hazardous       will not polymerise. 5/8

Notes (oral LD₅₀)	Based on available data the classification criteria are not met.
Acute toxicity - dermal	
Notes (dermal LD₅₀)	Based on available data the classification criteria are not met.
Acute toxicity - inhalation	Based on available data the classification criteria are not met.
Notes (inhalation LC₅₀)	based on available data the classification chiena are not met.
Skin corrosion/irritation Skin corrosion/irritation	Based on available data the classification criteria are not met.
Serious eye damage/irritation	
Serious eye damage/irritation	Based on available data the classification criteria are not met.
Respiratory sensitisation	
Respiratory sensitisation	Based on available data the classification criteria are not met.
Skin sensitisation	
Skin sensitisation	Based on available data the classification criteria are not met.
Germ cell mutagenicity	
Genotoxicity - in vitro	Based on available data the classification criteria are not met.
Genotoxicity - in vivo	Based on available data the classification criteria are not met.
Carcinogenicity	
Carcinogenicity	Based on available data the classification criteria are not met.
Reproductive toxicity	
Reproductive toxicity - fertility	Based on available data the classification criteria are not met.
Specific target organ toxicity -	
STOT - single exposure	Based on available data the classification criteria are not met.
Specific target organ toxicity -	
STOT - repeated exposure	Based on available data the classification criteria are not met.
Aspiration hazard	Net enticipated to present on conjustion beyond based on chamical structure
Aspiration hazard	Not anticipated to present an aspiration hazard, based on chemical structure.
SECTION 12: Ecological infor	mation
12.1. Toxicity	
Toxicity	Not considered toxic to fish. However, large or frequent spills may have hazardous effects on
	the environment.
12.2. Persistence and degrada	
Persistence and degradability	
12.3. Bioaccumulative potentia	_
Bioaccumulative potential	No data available on bioaccumulation.
Partition coefficient	Not determined.
12.4. Mobility in soil	
Mobility	The product is soluble in water.
12.5. Results of PBT and vPv	B assessment

# STP® Power Steering Fluid

Results of PBT and vPvB assessment	This product does not contain any substances classified as PBT or vPvB.
12.6. Other adverse effects	
Other adverse effects	Not determined.
SECTION 13: Disposal consid	erations
13.1. Waste treatment method	<u>s</u>
General information	Dispose of waste product or used containers in accordance with local regulations
Disposal methods	Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of the local water authority.
SECTION 14: Transport inform	nation
General	The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).
14.1. UN number	
Not applicable.	
14.2. UN proper shipping name	<u>e</u>
Not applicable.	
14.3. Transport hazard class(e	<u>es)</u>
No transport warning sign requ	uired.
14.4. Packing group	
Not applicable.	
14.5. Environmental hazards	
Environmentally hazardous su No.	bstance/marine pollutant
14.6. Special precautions for u	Iser
Not applicable.	
14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code	
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code	Not applicable.
SECTION 15: Regulatory information	
15.1. Safety, health and enviro	onmental regulations/legislation specific for the substance or mixture
National regulations	EH40/2005 Workplace exposure limits. The REACH etc. (Amendment etc.) (EU Exit) Regulations 2019, SI 2019/758 (as amended). The Chemicals (Health and Safety) and Genetically Modified Organisms (Contained Use) (Amendment etc.) (EU Exit) Regulations 2019, SI 2019/720 (as amended).
15.2. Chemical safety assessn	nent

No chemical safety assessment has been carried out.

### SECTION 16: Other information

Abbreviations and acronyms used in the safety data sheet	<ul> <li>ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road.</li> <li>RID: European Agreement concerning the International Carriage of Dangerous Goods by Rail.</li> <li>IMDG: International Maritime Dangerous Goods.</li> <li>IATA: International Air Transport Association.</li> <li>ADN: European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways.</li> <li>ATE: Acute Toxicity Estimate.</li> <li>DNEL: Derived No Effect Level.</li> <li>LC50: Lethal Concentration to 50 % of a test population.</li> <li>LD50: Lethal Dose to 50% of a test population (Median Lethal Dose).</li> <li>PBT: Persistent, Bioaccumulative and Toxic substance.</li> <li>vPvB: Very Persistent and Very Bioaccumulative.</li> <li>BCF: Bioconcentration Factor.</li> </ul>
Classification procedures according to SI 2019 No. 720	Not classified.: Calculation method.
Revision comments	Section 1: Identification of the substance/mixture and of the company/undertaking // 1.3. Details of the supplier of the safety data sheet.
Revision date	02/06/2021
Revision	12
Supersedes date	19/03/2020
